

RE FOR THE ATTENTION OF ALL THIRD YEAR AND FINAL YEAR STEM STUDENTS AT THE SCHOOL OF EDUCATION, UL [IN SCIENCE, MATHEMATICS, COMPUTER SCIENCE, ENGINEERING AND TECHNOLOGY EDUCATION]

Hello Students!

We hope you had a wonderful Christmas break and are settling into semester two well.

We are thrilled to invite you to our '**Application Process and CV workshop**' for the STEM Teacher Internship (STInt) Programme 2022. This is a joint collaboration between EPI•STEM at the University of Limerick and CASTeL at DCU. This online event will take you through the application process and what you can expect once you apply for a STInt internship. Join one of the sessions at a time that suits you from the options below.

To receive the Zoom link, register your interest now at <https://stemteacherinternships.ie/stintinternapplication/> and you will be sent all the details. This is a great chance to prepare your application and also gain valuable CV skills that can be applied going further in your career.

The STEM Teacher Internship Programme has placed 115 pre-service teachers in STEM roles across leading organisations in the last few years. It offers students 12-week fully paid internship roles across the summer months for penultimate and final year students on education programmes with STEM specialisms from our collaborating universities around Ireland. You can learn more about the STInt programme by watching our [newly released video here](#). The highly-competitive programme gives pre-service teachers a unique opportunity to work in roles, on projects, with teams and in companies that are leaders in their field - don't miss this fantastic opportunity! You can check out our [host organisations here](#).

of applying for the STEM Teacher Internship
Programme 2022

What our STInt alumni have to say about their experience:

*"I had an amazing experience working in Eirgrid as a STEM Teacher Intern. Eirgrid were very supportive throughout the experience and helped me learn in areas that interested me. I have developed so many skills that will help me throughout my career. I am also more aware of how many STEM career opportunities that I could take advantage of in the future. I was able to make connections and build relationships with people that I never would have without this experience. It allowed me to broaden my experience which will definitely stand to me in the classroom." **Áine Madden, STInt Intern 2021, EirGrid***

"I cannot recommend this STEM Teacher internship Programme enough, I was lucky enough to work with Microsoft during the 12 weeks, This internship has provided me with a fantastic insight into how Major STEM industries work, I have seen and learned first-hand how important Communication and team work is within a STEM role. Although my 12 weeks with Microsoft were done completely

remotely I really enjoyed my time, and learned a lot about the key attributes to a STEM role." **Colm O'Rourke, STInt Intern 2021, Microsoft**

"I applied for the Internship programme last year when I was in college but due to Covid 19, I was unable to complete it. So when I was given the opportunity to take part in the programme again this year, I jumped at the chance! From my participation in the internship programme, I hope to gain an insight into the STEM fields and experience which will no doubt influence my own teaching style and outlook on the STEM subjects. Throughout the duration of the programme, I would like to enhance my communication, organisation and develop my knowledge of information technologies." **Orla Flately, STInt Intern 2021, EY**
